## RECALCULATION NARRATIVE

### 1. Foundation Funding Recalculations.

(a) Teacher Salary Component. After the January 22, 2007 joint meeting of the House Education Committee and the Senate Education Committee, at which the two committees adopted "A Report on Legislative Hearings For the 2006 Interim Study on Educational Adequacy", school administrators presented a calculation for the teacher salary component of foundation funding that suggested an error in the recommended calculation. Lawrence O. Picus & Associates were contacted on behalf of the committees about the recalculation and confirmed that they had used incorrect inflators for 2005-2006 and 2006-2007 in their calculation of the teacher salary component. The committees agreed and recalculated the teacher salary component as computed by the school administrators, verified by the Bureau of Legislative Research, and adopted by the committees on February 22, 2007.

(b) Allocation for school level secretaries. The Adequacy Study Oversight Subcommittee recommended one (1) school level secretary be allocated in foundation funding for the 2007-2009 biennium. This was an increase over the Bisbee matrix used in 2003, which had no school level secretary allocation. Due to the admitted uncertainty of Picus in the figures used to develop recommendations for salaries and staffing for school districts, and based on other information provided to the committees, the subcommittee recommended that the interim committees conduct an examination of the practices of school districts. The original recommendation of one school level secretary for the prototypical 500-student school is restored, and the study recommended by the Adequacy Study Oversight Subcommittee should be pursued.

These changes in foundation funding will result in the following increases:

- In 2007-2008, a \$57 per pupil (1.0%) increase in foundation funding for 2007-2008 over the 2006-2007 fiscal year, for a total increase of \$26,049 million; and
- In 2008-2009, a cumulative increase of \$127 per pupil (2.2% cumulative) in foundation funding for the biennium (\$70 per pupil and a 1.2% increase over the 2007-2008 funding), for a total cumulative increase of \$84,088 million for the biennium (\$31,990 million over the 2007-2008 funding).

## **2. Student Growth Funding.**

(a) The committees determined that paying growth funding based on the increase in the two-quarter average daily membership (ADM) for the current school year over the two-quarter ADM for the previous school year produces either duplicate funding or funding for non-existent students in two scenarios:

- As foundation funding is based on the three-quarter ADM of the previous year, school districts that continue to grow are funded double for students who were counted in the two-quarter ADM and who are still in attendance for the three-quarter ADM for foundation funding.
- School districts that decline in enrollment after the second quarter are being funded for students who are no longer attending.

(b) As there is a lack of evidence-based research anywhere in the nation concerning the actual costs of student growth for a school district, it is our recommendation that the General Assembly enact legislation providing for the Department of Education and the Division of Legislative Audit to conduct a thorough study of the financial impact of student growth on public school districts in Arkansas and report back to the General Assembly no later than April 1, 2008. The committees further recommend that student growth funding should be calculated using the current recommendation for per pupil foundation funding to avoid the possibility of inadequate funding until the matter can be further studied.

Therefore, a new funding mechanism of quarterly calculations utilizing the foundation funding recommendations and based on comparisons of each quarter in the current year to the three-quarter ADM in the previous year.

## **3. 98% Collection Rate.**

Updated figures have been provided to calculate the 98% collection adjustment. The new figures are \$13,435,165 for the 2007-2008 school year and \$14,268,625 for the 2008-2009 school year, representing increases of \$140,065 and \$98,428, respectively, over the original education funding recommendations for those years.
