Purpose: Amendment #: Amount: \$
This project, called a potential national model by the CDC, is a systems change approach that promotes the use of pharmacists as non-physician members of the health care team to improve health outcomes by brokering a partnership between worksites, communities, pharmacies and primary care providers. The aim of the project is to train local pharmacists to provide diabetes, heart disease and other chronic disease assessments, counseling and medication therapy management for individual residents and employees at identified worksites in targeted counties.

ARcare will offer determined statewide HIV prevention projects to increase early HIV diagnosis through HIV testing and counseling which will ensure entry into an appropriate care continuum and address any obstacles to continued care. ARcare will seek to reduce new HIV infections in the state of Arkansas through education, awareness and will provide HIV prevention/reduction tools to Arkansas communities, statewide, while focusing on communities at high risk for HIV in locations hosting Ryan White HIV case management offices and strong community partners. This project will expand into areas needing to develop community partners and prevention programs. ARcare will provide voluntary testing, counseling, outreach, education and linkage to care to high risk populations.
