## **Tax Reduction Bills Passed During the 2013 Regular Session** [Exhibit E]

Mr. Richard Wilson, Assistant Director, Bureau of Legislative Research, gave an overview of the tax reduction bills passed during the 2013 Regular Session. Mr. Wilson said for FY14, the total impact will be \$11.7 million, and \$161 million in FY16. Mr. Wilson said the reduction in the grocery tax is subject to a reduction in certain expenditures, and the desegregation money is most likely to trigger the reduction. If the grocery tax reduction took place in FY16, the impact would be approximately \$200 million.

Representative Collins said he had requested Mr. Wilson run two individual income tax reduction scenarios to build on the reduction implemented by HB1585. The first handouts (#1) Mr. Wilson provided were reductions in individual income tax rates, listing current tax brackets and interest points. The two rate reduction scenarios are based on a .2% rate reduction each year and a .3% rate reduction each year until the individual state income tax rate is eliminated.

Mr. Wilson's second handout (#2) compared growth rates in the state's individual income tax revenue (IIT) to the gross state product (GSP) beginning in year 1977 through 2013. The compound growth rate for IIT was 7.750% and 5.61% for GPS. The long linear growth rate for IIT equaled 7.096% and GPS equaled 5.491%. Mr. Wilson stated from 1977 through 2013, tax brackets did not change.

Mr. John Theis, Department of Finance and Administration, will research the fiscal impact of Representative Collins HB1585 and provide that information to committee staff for dissemination to committee members.

Senator Teague requested a list of the new taxes implemented as a result of the Affordable Care Act.

Meeting adjourned at 10:50 a.m.
