SECTION 7. Arkansas Code Title 20, Chapter 15, Subchapter 16, concerning the Prostate Cancer Act of 1999, is repealed.

~~20-15-1601. Title.~~

~~This subchapter shall be known and may be cited as the "Prostate Cancer Act of 1999".~~

~~20-15-1602. Legislative findings.~~

~~(a) The General Assembly finds that:~~

~~(1) Prostate cancer is the most common cancer and the second leading cause of cancer death among men, causing approximately one hundred eighty-four thousand five hundred (184,500) new cases and approximately thirty-nine thousand two hundred (39,200) deaths in the United States annually. This means that approximately two thousand four hundred (2,400) Arkansas men will develop prostate cancer in any year and approximately five hundred (500) men will die of it;~~

~~(2) The elderly population and rural nature of Arkansas combine to make prostate cancer a greater problem here than in most states. Prostate cancer is rarely diagnosed in men younger than fifty (50) years of age, and the rate of prostate cancer increases faster with age than does any other malignancy. The median age of diagnosis is seventy-two (72) years. Men living in rural areas are diagnosed with higher-stage prostate cancer than men living in urban areas;~~

~~(3) In the United States, African-American men face a far greater risk from prostate cancer than do Caucasian-American men. Caucasian-American men will contract prostate cancer at a rate of one hundred forty-seven and three-tenths (147.3) per one hundred thousand (100,000). African-American men will contract prostate cancer at a rate of two hundred twenty-two and nine tenths (222.9) per one hundred thousand (100,000). Caucasian-Americans will suffer twenty-three and seven tenths (23.7) deaths per one hundred thousand (100,000) from prostate cancer each year, while African-American men will suffer fifty-four and eight tenths (54.8) deaths per one hundred thousand (100,000);~~

~~(4) In Arkansas, twenty-seven percent (27%) of African-American men are over forty (40) years of age, and forty-seven percent (47%) live in rural areas. African-American men are less likely to participate in screening than men in other subpopulations despite the fact that they have an increased risk. Only forty-two percent (42%) of African-American men fifty (50) to seventy (70) years of age have undergone digital rectal examinations in their lifetimes, versus fifty-nine percent (59%) of Caucasian-American men in the same age range;~~

~~(5) Men who have prostate cancer detected in the earlier stages have significantly better five-year survival rates of ninety-four percent (94%), compared to those men who have their cancer diagnosed in advanced states, thirty percent (30%). Despite this positive statistical finding, widespread prostate cancer screening remains controversial because of the variability of the growth of the disease, the slow-growing nature of many prostate cancers, the limited accuracy of screening tests, and the significant side effects of treatment;~~

~~(6) About seven thousand (7,000) Americans were expected to get testicular cancer in 2001, with an estimated three hundred twenty-five (325) deaths. Compared with prostate cancer, testicular cancer is relatively rare. However, in men fifteen (15) to thirty-four (34) years of age, it ranks as the most common cancer. For unknown reasons, the disease is about four (4) times more common in Caucasian-American men than in African-American men;~~

~~(7) Only fifteen (15) years ago, a diagnosis of testicular cancer was grim news. Ten (10) times as many patients died then as now. But dramatic advances in therapeutic drugs in the last two (2) decades, along with improved diagnostics and better tests to gauge the extent of the disease, have boosted survival rates remarkably. Now, testicular cancer often is completely curable, especially if found and treated early. About seventy percent (70%) of men with advanced testicular cancer can be cured, according to the National Cancer Institute;~~

~~(8) Advocates of screening hope to save the lives of thousands of men dying of prostate cancer. Opponents of screening fear that needless suffering will result from the treatment of men with occult disease who are not destined to develop clinical symptoms;~~

~~(9)(A) The high death rate from prostate cancer in African-Americans suggests a need for special attention to reduce this mortality rate. In November 1997, the American Cancer Society, the National Cancer Institute, and the Centers for Disease Control and Prevention sponsored a leadership conference on prostate cancer. The resulting Prostate Cancer National Blueprint for Action calls for:~~

- ~~(i) Research in basic and behavioral science;~~
- ~~(ii) Health promotion and education based on science;~~
- ~~(iii) Education and support for patients; and~~
- ~~(iv) Public policy action.~~

~~(B) The Prostate Cancer National Blueprint for Action also recommends that primary care practitioners be educated to interact with patients and participate in discussions that will lead to informed decisions; and~~

~~(10) The State of Arkansas should take the lead in combatting prostate and testicular cancer because of our population's characteristics and the high risk of prostate and testicular cancer.~~

~~(b)(1) It is the intent of the General Assembly in enacting this subchapter to fund services with respect to large-population screening for prostate and testicular cancer and to provide educational services to the men of Arkansas regarding prostate and testicular cancer.~~

~~(2) At least fifty percent (50%) of all funding available to administer this subchapter shall be used to provide for the early detection, diagnosis, or treatment of prostate and testicular cancer and for prostate and testicular cancer education and awareness.~~

~~20-15-1603. Oversight Committee on Prostate and Testicular Cancer.~~

~~(a) The Oversight Committee on Prostate and Testicular Cancer is created and shall be composed of seven (7) members as follows:~~

~~(1) One (1) individual from the private medical community who shall be a practicing urologist, a practicing radiation therapist, or a practicing medical oncologist;~~

~~(2) One (1) faculty member from the Arkansas Cancer Research Center of the University of Arkansas for Medical Sciences;~~

~~(3) One (1) representative from the American Cancer Society;~~

~~(4) One (1) public health educator;~~

~~(5) The Director of the Division of Health of the Department of Health and Human Services or the director's designee; and~~

It is found and determined by the General Assembly, that the Constitution of the State of Arkansas prohibits the appropriation of funds for more than a one (1) year period; that the effectiveness of this Act on July 1, 2009 is essential to the operation of the agency for which the appropriations in this Act are provided; with the exception that Section 2 and Section 3 in this Act shall be in full force and effect from and after the date of its passage and approval, and that in the event of an extension of the Regular Session, the delay in the effective date of this Act beyond July 1, 2009, with the exception that Section 2 and Section 3 in this Act shall be in full force and effect from and after the date of its passage and approval, could work irreparable harm upon the proper administration and provision of essential governmental programs.
