15-4-3402. Legislative intent.

The General Assembly finds that:

(1) The support of regional economic development efforts is vital to the economic health and vitality of the state;

(3) The economy of the state varies significantly, and effective policies and programs must be customized to take advantage of resources and strengths within a particular region;

(4) New economic development strategies will meet the special needs and take advantage of the extraordinary assets of particular regions of the state instead of relying on a single approach; and

(5) When economically feasible, the state should assist regional public-private efforts to promote economic development by providing state funds to share the cost of eligible marketing and promotional expenses associated with implementing a regional strategic plan.

(b)(1) After a regional economic development partnership has been formed, a municipality or county within the geographic region in which the regional economic development partnership is located may elect to join the regional economic development partnership by adopting an ordinance to that effect.

(2) However, a municipality or county that adopts an ordinance under subdivision (b)(1) of this section shall become a member of the regional economic development partnership only upon a majority vote of the members of the board of directors of the regional economic development partnership.

Upon motion of Representative Smith, **HOUSE BILL NO. 2185** was placed back on second reading for the purpose of amendment.

AMENDMENT NO. 1 TO HOUSE BILL NO. 2185

Amend **HOUSE BILL NO. 2185** as originally introduced:

Delete everything following the enacting clause and substitute the following:

"SECTION 1. NOT TO BE CODIFIED. Legislative intent. The General Assembly finds that:

(1) Nonresidential large business consumers of electricity and natural gas know best which energy efficient investments to make in their businesses and should be allowed to choose how their available capital resources are best invested to save energy in their facilities;

(2) Energy efficiency measures implemented by non-residential large business consumers of electricity and natural gas provide the same kinds of system benefits for their utility suppliers and other customers as are provided by a mandatory utility-managed energy efficiency program;

(3) A mandatory requirement that non-residential large business consumers of electricity and natural gas pay for their utility supplier energy efficiency programs ensures that some large business consumers will be forced to pay for programs that directly compete with their own energy efficiency investment capital; and

(4) States adjoining Arkansas have implemented simple energy efficiency program opt out mechanisms for their business consumers, putting Arkansas non-residential business consumers at a significant competitive disadvantage relative to competitors in states such as Texas and Oklahoma.

SECTION 2. Arkansas Code § 23-3-405 is amended to read as follows:

23-3-405. Authority of Arkansas Public Service Commission — Rates and charges - Exemption.

(a)(1) The Arkansas Public Service Commission is authorized to propose, develop, solicit, approve, require, implement, and monitor measures by utility companies which cause the companies to incur costs of service and investments which conserve, as well as distribute, electrical energy and existing supplies of natural gas, oil, and other fuels.

(2) After proper notice and hearings, the programs and measures may be approved and ordered into effect by the commission if it determines they will be beneficial to the ratepayers of such public utilities and to the utilities themselves.

(3) In such instances, the commission shall declare that the cost of such conservation measures is a proper cost of providing utility service. At the time any such programs or measures are approved and ordered into effect, the commission shall also order that the affected public utility company be allowed to increase its rates or charges as necessary to recover any costs incurred by the public utility company as a result of its engaging in any such program or measure.

(b) Nothing in this subchapter shall be construed as limiting or cutting down the authority of the commission to order, require, promote, or engage in other energy conserving actions or measures.

(c)(1) A nonresidential rate payer of a public utility company having a minimum peak electrical demand of one megawatt (1 MW) or an annual natural gas usage of seventy thousand million British Thermal Units (70,000 MMBTU) may provide a certification of exemption to the commission no later than March 1 of any year stating that they have implemented or will implement a measure or have made or will make an investment designed to provide energy savings for the nonresidential rate payer.

(2)(A) Upon receipt of the certification of exemption under this subsection, the commission shall notify the public utility company of the exemption.

(B) Beginning on June 1 following notification of the exemption:

(i) The nonresidential rate payer shall not be required to participate in the programs or measures required by the commission under this section;

(ii) The public utility company shall cease billing all of the accounts of the nonresidential rate payer for the programs and measures required by the commission under this section; and

(iii) The nonresidential rate payer shall not be eligible to participate in public utility company energy efficiency programs.

(3) An exemption under this subsection continues until it is withdrawn by the nonresidential rate payer."

Chief Clerk

Upon motion of Representative Barnett, **HOUSE BILL NO. 1450** was placed back on second reading for the purpose of amendment.

AMENDMENT NO. 1 TO HOUSE BILL NO. 1450

Amend **HOUSE BILL NO. 1450** as originally introduced:

Delete Section 1 and 2 in their entirety and substitute:

"SECTION 1. Arkansas Code Title 15, Chapter 72 is amended to add an additional subchapter to read as follows:

Subchapter 11 — Carbon Dioxide Storage

15-72-1101. Title.

This subchapter shall be known and may be cited as the "Arkansas Carbon Dioxide Storage Act".

15-72-1102. Legislative finding.

(a) The General Assembly finds that:

(1) Carbon dioxide is a substance that occurs naturally in the environment as a result of biological processes and that exists as a gas at standard temperature and pressure;

(2) Carbon dioxide is released during combustion of any material that contains carbon including coal, natural gas, oil, and wood, all of which exist in abundance and the production and use of which is one of the foundations of our state's economy;

(3) Carbon dioxide is currently being released into the atmosphere in substantial volumes through the combustion of such materials as coal, natural gas, oil, and wood;

(4) For many years, technologies for the injection, use, and storage of carbon dioxide in underground geologic formations have been developed and successfully used for the extraction of underground natural resources such as oil and natural gas;

(5) The storage of carbon dioxide in underground geologic formations may be an effective means for reducing the release of carbon dioxide into the atmosphere from anthropogenic sources;

(6) The transportation and storage of carbon dioxide in underground geological formations and for beneficial use or reuse in industrial and commercial applications is expected to increase in the United States and in Arkansas due to initiatives by federal, state, and local governments, industry and commerce, and other interested persons and may present an opportunity for economic growth and development for the state; and

(7) The United States Environmental Protection Agency is moving forward with regulations that may require industry to address carbon dioxide emissions, and recent federal regulatory developments, including the United States Environmental Protection Agency Underground Injection Control Program for Carbon Dioxide Geologic Sequestration Wells, make it prudent and appropriate to allow for the transportation of carbon dioxide and the storage of carbon dioxide in underground geologic formations as an alternative to its release into the atmosphere.

(b) The General Assembly also finds that:

(1) The transportation and storage of carbon dioxide will benefit the citizens of the state by reducing carbon dioxide emissions;

(2) Carbon dioxide may have potential for use in other industrial and commercial processes and applications;

(3) Transportation and storage of carbon dioxide may allow for the orderly withdrawal and use or reuse as appropriate or necessary, thereby allowing carbon dioxide to be available for commercial, industrial, or other uses, including the use of carbon dioxide for enhanced recovery of oil and gas;

(4) the protection of private property rights and interests are essential and may be impacted by the underground storage of carbon dioxide; and

(5) It is the public policy of this state and the purpose of this subchapter to provide for a coordinated statewide program for the transportation and storage of carbon dioxide in underground geological formations and also to fulfill the state's primary responsibility for ensuring compliance with the federal Safe Drinking Water Act, 42 U.S.C. § 300f et seq., including recent regulations concerning the underground injection of carbon dioxide.

(6). The risks and technology for the injection of carbon dioxide on a commercial scale are not entirely known and in the development stage with only pilot projects being completed and as such there is sufficient time for the legislature to study all issues associated with this matter.

(c) The General Assembly further finds that:

(1) Liability issues surrounding long-term storage of carbon dioxide must be addressed in order to encourage the development of projects under this subchapter;

(2) Liability insurance is a key component of the injury compensation structure contemplated in this subchapter;

15-72-1103. Definitions.

(f)(1) The Arkansas Department of Environmental Quality may administer on behalf of the state, subject to the approval of the Governor, its own program for the underground injection of carbon dioxide for the purpose of geologic sequestration within its jurisdiction in lieu of that of the United States Environmental Protection Agency under the federal Safe Drinking Water Act, 42 U.S.C. § 300f et seq., as it existed on February 1, 2011.

(2) The Arkansas Department of Environmental Quality may submit to the Administrator of the United States Environmental Protection Agency an application for approval of a program that the Arkansas Department of Environmental Quality proposes to establish and administer for the underground injection of carbon dioxide for the purpose of geologic sequestration as provided in Section 1422 of the federal Safe Drinking Water Act, 42 U.S.C. § 300f et seq., as it existed on February 1, 2011.

(3) The Department, the Arkansas Pollution Control & Ecology Commission and the Oil and Gas Commission shall:

(A) Meet the requirements of Section 1422 of the federal Safe Drinking Water Act, 42 U.S.C. § 300f et seq., as it existed on February 1, 2011, relating to the underground injection of carbon dioxide for the purpose of geologic sequestration; and

(B) Enter into interagency written agreements or understandings that may be necessary or convenient for the delegation or sharing of responsibility or administration relating to the underground injection of carbon dioxide for the purpose of geologic sequestration.

(g) No agency of state government or political subdivision of the state may regulate a facility or activity for the purpose of the transportation, storage, or withdrawal of carbon dioxide for the purpose of storage in underground geologic formations except as expressly authorized under this subchapter.

(h) No person or entity may construct or operate any part of a carbon dioxide storage facility without first obtaining a permit from the Arkansas Department of Environmental Quality. No authorizing permits by any state agency to proceed under this chapter or otherwise for any carbon dioxide storage facility shall be issued until June 30, 2013.

15-72-1105. Delegation of Authority

(a) The legislature, after the interim study named herein, shall empower the proper agencies with authority to provide for a coordinated statewide program for the transportation and storage of carbon dioxide in underground geologic formations which shall be determined by the legislature and implemented no later than June 30, 2013. Such agency rules shall, at a minimum, address such issues as the following:

(1) The public necessity for a proposed storage facility or carbon dioxide transmission pipeline;

(2) The economic reasonableness of a proposed storage facility;

(3) The suitability of the location of a proposed storage facility, including its reservoir;

(4) The environmental impact of a proposed storage facility or carbon dioxide transmission pipeline;

(5) Financial requirements, including long-term financial assurance or responsibility, for the construction, operation, monitoring, closure, remediation and long-term care of a proposed storage facility;

(c) This section is not intended to change, impinge upon, or impair any existing rights to store underground, extract, mine or otherwise produce coal, oil, gas, coalbed methane, or other mineral interests, including rights under the Underground Storage of Gas Law, § 15-72-601 et seq., or to prevent any party from asserting adverse possession of the reservoir and pore space."

SECTION 2. Do. Not Codify. The Utilities Subcommittee of the House Insurance and Commerce Committee shall study and review:

(1) The impact of the underground storage of carbon dioxide on private property rights and interests;

(2) The use of available legal mechanisms for the amalgamation of property rights necessary for the orderly development of carbon dioxide storage facilities;
