22 BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF ARKANSAS:
23

24 SECTION 1. Arkansas Code Title 20, Chapter 8, is amended to add an
25 additional subchapter to read as follows:

26 Subchapter 12 – Universal Newborn Home Nurse Visitation Program
27

28 20-8-1201. Legislative findings and intent.

29 (a) The General Assembly finds that:

30 (1) The weeks following birth are a critical period for the
31 woman who has given birth and the infant, setting the stage for long-term
32 health and well-being;

33 (2) During this period, the woman who has given birth is
34 adapting to multiple physical, social, and psychological changes, while
35 simultaneously recovering from childbirth, adjusting to changing hormones,
36 and learning to feed and care for a newborn;

1 (3)(A) Like prenatal care, the postpartum healthcare visit that
2 typically occurs six (6) weeks after childbirth is considered important to a
3 new parent's health.

4 (B) However, for a woman who has given birth, the six-week
5 postpartum visit punctuates a period devoid of formal or informal support for
6 the woman;

7 (4) Additionally, according to the American College of
8 Obstetricians and Gynecologists, as many as forty percent (40%) of women who
9 have given birth in the United States do not attend a postpartum visit;

10 (5) During the time immediately following delivery, healthcare
11 providers are uniquely qualified to enable a woman who has given birth to
12 access the clinical and social resources the woman needs to successfully
13 navigate the transition from pregnancy to parenthood;

14 (6) Research also indicates that postpartum education and care
15 lead to lower rates of morbidity and mortality in women who have given birth,
16 as many of the risk factors for postpartum complications, such as
17 hemorrhaging or a pulmonary embolism, may not be identifiable before a woman
18 who has given birth at a hospital or birthing facility is discharged
19 following the birth; and

20 (7) Research demonstrates the wide-ranging benefits to women who
21 have given birth, children, and families when a woman who has given birth and
22 the newborn infant receive support from the medical community within days
23 after delivering the child.

24 (b) It is the intent of the General Assembly to remove barriers
25 regarding access to postpartum care and to establish the infrastructure for a
26 woman who has given birth in this state to receive one (1) cost-free home
27 nurse visit in which a registered nurse provides physical, social, and
28 emotional support critical to recovery following childbirth.
